

# OEMA - Environmental Policy Statement

OEMA is committed to the concept of reducing to a minimum any actions that have an adverse effect on the environment.

In conducting its business OEMA aims to prevent pollution and to save natural resources by operating in the most environmentally efficient and friendly way and by recycling wherever this is practical.

This it does by not only keeping its use of materials down to a minimum but also its use of non-renewable resources such as fuel and, indirectly, of electricity. This commitment extends to all areas of OEMA.

OEMA further aims to continually improve its environmental performance in order to safeguard the quality of the environment, both locally and globally.

## **Legislation and regulations**

All applicable legislation and regulations are adhered to at all times and it is OEMA policy to keep up to date and implement the requirements of all new environmental legislation.

## **Local requirements**

It is the aim of OEMA, irrespective of any regulations or legislation to be a good neighbour and while carrying out its processes, whether on our premises or those of our customers to reduce to an absolute minimum any environmental problems.

## **Review of environmental policy, objectives and targets and communication**

OEMA sets environmental objectives and targets that are publicised to staff. These objectives and targets are regularly reviewed by means of its environmental auditing, non-conformance control and management review processes.

This policy has been communicated to OEMA staff to ensure it has been understood, and will be implemented and maintained by all staff.
